

Passionise Six Phase Personal Transformation

We believe in your holistic development and that is why our programs are based on diverse methodologies that can power your emotional, spiritual, and professional growth. These phases are vital aspects of next generation **Entrepreneurial Education**. We take you through a six phase inner journey starting from Emotional Intelligence all the way to developing an Inspired Vision that will not only lead you to success but also fulfillment in life.

Emotional Intelligence

Your real power lies in your emotions. We help you identify the fears, worries, guilt, insecurities, blockages in your self confidence, and lack of control over anger, and give you powerful tools to evolve into a leader that is self confident, peaceful, joyful and more open to love others. Once this shift occurs, you will heal strained relationships, find others ready to collaborate with you, and be someone that others would love to be around. This would lead to success in every aspect of your life.

Values and Beliefs

Beliefs create reality! A large number of missed opportunities are because we never even try, because of beliefs that we won't succeed, or that we are not good enough, or success is difficult to achieve. We fail in relationships because of beliefs that we must please our partner without seeking a genuine balance. As we replace limiting beliefs with more empowering beliefs, our actions change, we gain self confidence and start becoming more successful. Our exercises are designed to identify and alter limiting beliefs.

Creativity and Intuition

The logical brain is limited in its ability to process complex information and make informed decisions. But a wealth of valuable insights and creative ideas reside in the sub-consciousness. To access them, one must connect to the wisdom of the heart and the intelligence of the body to make meaningful decisions. Intuitive skills are used by most successful Business Leaders to make quick decisions, by feeling through the problems, and sharpening their instincts or gut feelings. Artists and musicians go to that relaxed state to produce beautiful works of art. We teach you how to access this power.

Passion and Motivation

What creative talents are hiding inside of you that you would love to explore? Whether it is design, art, communication, building solutions, or using your knowledge and skills to help others, we help you explore your inner motivations. When you work in the direction of your passion, that is when you start upgrading your potential to be highly productive and at the same time enjoy your work. We help you align your passion with your professional work or entrepreneurial endeavors. When you work with your passion, it is then that the most creative entrepreneurial world-changing ideas emerge.

Purpose and Inspiration

We help you identify a vision based on your passions and motivations. This vision is in harmony with your Entrepreneurial, Professional, and Personal goals where conflicts between them are minimised. Also we try to identify what is the contribution of your vision to the well being of others. For example, this could be in the form of businesses that improve the lives of their clients, or technologies that preserve the environment. When your goal becomes bigger than you, and that is when your motivation levels will skyrocket and you can achieve almost anything.

Vision

Whether it is building a business or building a product, make sure you do your homework and have well thought out strategies. We empower you with tools from the best Entrepreneurial and Business Strategy Programs to make sure you have the leading edge. We also help you identify skills that you need to acquire to move in the direction of your vision.
